SKILLS

JavaScript | TypeScript | C | HTML/CSS | SQL | NodeJs | React | Jest | Tailwind CSS | Python| Vue | Cypress | Nuxt

EXPERIENCE

TechGuilds – *Jr. Full Stack Developer*
Apr 2022 - Feb 2024
Toronto ON, CA

Tech: Typescript, React, AEM React, Sitecore JSS, TailwindCSS, SCSS, Cypress, Jest

• Developed reusable components using AEM React which allows the content team to build out pages at a quicker and more streamlined pace.
• Participated in agile development methodologies, such as Scrum or Kanban, attending daily stand-ups, sprint planning, and retrospective meetings to ensure effective project management and collaboration.
• Conducted code reviews and implemented improvements based on feedback from senior developers, enhancing code readability, performance, and maintainability.

Bambee– *Front End Developer (Intern) – via Launch Up*
Mar 2023 - Sept 2023
Toronto ON, CA

Tech: Typescript, Vue3, Nuxt3, BuilderIO, TailwindCSS, CSS

• Employed TailwindCSS, a utility-first CSS framework, along with CSS, to style and customize components, ensuring consistent design patterns and responsive layouts across the application.
• Implemented and maintained the project's architecture using Nuxt3, a Vue.js framework, to optimize performance, enable server-side rendering, and improve the overall developer experience.
• Collaborated with the development team to develop and enhance frontend web applications using Vue3, leveraging the power of Typescript to ensure type safety and improved code quality.

Erdos– *Front End Developer (Intern) – via Launch Up*
Nov 2022 - Feb 2023
Toronto ON, CA

Tech: Typescript, React, TailwindCSS, Redux

• Developed and maintained frontend web applications using React, leveraging the power of Typescript to ensure type safety and improved code quality.
• Implemented responsive and visually appealing user interfaces by utilizing TailwindCSS, a utility-first CSS framework, to efficiently style components and achieve a consistent design system.
• Utilized Redux, a state management library, to manage and synchronize the application state, allowing for predictable and scalable data flow throughout the React components.

BrainStation– *Teaching Assistant, Web Development*
Aug. 2021 - Dec. 2021
Toronto ON, CA

Tech: Typescript, React, Heroku, MYSQL, Jest

• Based on my high performance I was selected to become a teacher's assistant for full-time students attending BrainStation's Full Stack Web Development Diploma Program. The technologies learned as part of the program include JavaScript, Node, React, Express, MySQL, Deployment (Heroku), Testing (Jest), and Agile Development.

PROJECTS

My Q&A AI– Q&A AI Web App
Jan 2023
Brampton ON, CA

Tech: Typescript, REST, React, TailwindCSS

• Took part in the Open AI Front End Developer Intern Challenge. Used React, Typescript and TailwindCSS to build out an application that allows users to ask AI questions and get responses back. Responses and the user's question are stored on the client.

Kangae –Idea Sharing Web App
Aug 2022
Brampton ON, CA

Tech: Typescript, REST, MongoDB, React, Tailwind CSS, REST, Express, Socket.io

• Created a web app that allows users to share ideas and connect. A social media app centered around connecting innovative and creative ideas with like-minded people.

DevFinder – Github Profile Web App   Aug 2022
Tech: Typescript, REST, React, Tailwind CSS, REST   Brampton ON, CA

· Created a GitHub profile finder. Users can search for different GitHub users and switch the theme of the site from light to dark.

EDUCATION

Launch Up   Sept 2022 - Sept 2024
Software Engineering Education   Toronto ON, CA

Seneca College   Jan 2023 - Aug 2024
Diploma of Education, Computer Programming   Toronto ON, CA

BrainStation   Jun 2021 - Aug 2021
Diploma of Education, Software Engineering   Toronto ON, CA

Treehouse   Oct 2020 - Jun 2021
Treehouse Techdegree Certificate, Web Development   Toronto ON, CA
